1. The Examiner has carefully considered Applicant's Response of 12/13/05. The Examiner does not find that Applicant's argument overcomes the prior rejection. In particular, the term "continuous" must be given the broadest meaning within the art that is not repugnant to the disclosure. In this case, the limitation of the term is met by the two components of the body of either Wentfort, Jr. et al. or Engelfriet et al. which have been formed such that no physical barrier exists between the components, resulting in a single structure of the tool. Addressing the argument to the double patenting rejection.

Again, the Examiner does not find Applicant's argument persuasive. In particular, the inherent characteristics of the different materials meet the claim limitations.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 15-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Wentfort, Jr. et al.

Wentfort, Jr. et al. discloses a wire drawing die comprising :

an first part comprising a first material (11); and

a second part comprising a second material (13);

wherein said first a second materials are in direct contact; and

wherein said second material comprises steel.

4. Claims 15-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Engelfriet et al.

Engelfriet et al. discloses a wire drawing die comprising :

an first part comprising a first material (5); and

a second part comprising a second material (6);

wherein said first a second materials are in direct contact; and

wherein said second material comprises steel.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 15-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11-26 of U.S. Patent No. 6,461,563. Although the conflicting claims are not identical, they are not patentably distinct from each other because the pending claims are encompassed by the claims of the conflicting patent.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
